

Year 4 homework suggestions

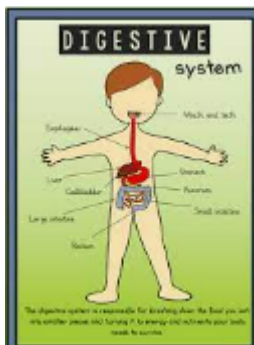

Eat Up! Autumn 2

Your homework challenge this half term is to create a project based on what you have found out about the digestive system or you may prefer to think about our learning about maps.

Possibilities include (but not restricted to):

Writing

Write an information leaflet about how the digestive system works. You may want to include fascinating facts, diagrams etc.

Map work

Can you make a map of your route to school?

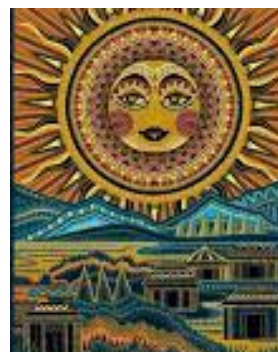

Teeth

How many teeth have you got at the moment?
Can you find out when you first got / lost a tooth?
Maybe you have some photos to share.
You may want to make a poster explaining how to look after your teeth.

Art / Design

Think about the art we have been doing in class. Can you create your own repeated pattern design by printing?
You may want to use the computer for this!

Homework projects due in **by FRIDAY 6th JANUARY**

Enjoy!
