Yahtzee Dice Game Play:

The game has 13 categories to score which are divided between two sections; UPPER SECTION and LOWER SECTION. Each category can be scored only once. Categories can be scored in any sequence.

There are 13 rounds in the game. Players can score in one category in each round. Players take turn to roll 5 dice in each round. After each roll the player can set aside one or more dice and then roll remaining dice. A maximum of 3 rolls are allowed to all players in each round. All five dice are available to be thrown anytime in a roll including the ones which were set aside in previous rolls.

UPPER SECTION has a bonus of 35 if players score 63 or more in it. There is a separate **Yahtzee Bonus** awarded in LOWER SECTION provided certain conditions are met (read on for further explanation).

TOTAL SCORE		

Some combinations can be scored in more than one category. For ex, a Full house can be scored in Full house, or Three of a kind, or Chance. Large Straight can be scored in Small straight.

Yahtzee combination can be scored in Full house as well as Yahtzee. Though as per the official rules Yahtzee cannot be scored in Full house category. This rule can be predetermined by the players at the beginning of the game.

If players can not score in a category, they can still mark it for a score of zero.
